Oregon Energy – Aurora Uranium Project

Metallurgy

Energy Ventures commenced a metallurgical program in Quarter 3 last year aimed at evaluating and repeating results from pressure leaching tests conducted by Placer Pacific in the 1980's where recoveries of up to 95% uranium were achieved under relatively modest conditions. An initial bench scale test in Quarter 3 of 2014 at a third party facility could however not be completed due to technical difficulties with the leach vessel.

Energy Ventures' metallurgical consultant has subsequently acquired an autoclave and is in the process of registering the apparatus with the relevant regulatory authorities. It is anticipated that the autoclave will be available in February 2015 at which point Energy Ventures will continue its test work program.

Background to Aurora Uranium Project

The Aurora uranium project is located in the southeast part of Oregon, USA and is one of the largest undeveloped uranium deposits in the country. Mineralisation is hosted by a highly altered sequence of flat-lying volcanic rocks that may be amenable to mining extraction by open pit methods at very low cost due to the low waste to ore ratio. Initial leach testwork by previous operators and EVE have shown potentially economic extraction of the uranium into solution by acid leaching at atmospheric temperature and pressure, though further work is required to optimise the leach regime and final flowsheet.

The Aurora deposit has a total resource base of **38 Mlb eU₃O₈¹** comprising an Indicated Resource of **36.7 Mlb eU₃O₈** at a grade of **253 ppm eU₃O₈**, and an Inferred Resource of 1.2 Mlb eU₃O₈ at a grade of 151 ppm eU₃O₈. The Indicated Resource includes a contiguous zone of mineralisation that contains **18 Mlb eU₃O₈** at a grade of **444 ppm eU₃O₈** (300 ppm eU₃O₈ cut-off grade) and occurs in the upper part of the deposit.

Further information on the project is available at <http://www.oregon-energy.com/oregon.htm>

Other Listed Investments

Energy Ventures holds an equity interest, 4.5m shares, in African Energy Resources Limited (ASX, BSE: AFR), an ASX and BSE listed resources company focussed on exploration and development of energy projects in Africa. African Energy is currently advancing the development of a large deposit of thermal coal in Botswana.

Additionally the Company holds positions in unlisted companies Wayland Copper Ltd and Agricola Resources Plc.
